

Meet Omni. Your personal AI team.

Life admin is scattered across apps.

Omni brings the work together. Agents prepare. You approve.

■ Product prototype

Meet Omni.

Your personal AI team.

A little less on your plate.

01 / MONEY

Know what’s due.

Bills, budgets and spending in one view.

Electricity bill

Ready to review

02 / MY DAY

Make the day work.

Plans, to-dos and calendar conflicts.

Tuesday overlap

Find a better time

03 / RESEARCH

Get the useful part.

News on your interests, with source links.

Powered by Exa

Read the source

04 / YOUR AGENTS

Keep the final say.

See the proposed action. Approve or reject.

Human in the loop

You’re in control

Prototype views today. Autonomous execution and voice are part of the roadmap.

Just the decisions.

Agents prepare.
You approve or reject.

 omni .

Your agents / 3 decisions ready

01	Send the billing query? Money agent · Bill checked. Email drafted.	Money	Approve	Reject
02	Move the dentist appointment? Calendar agent · Thursday, 2pm found.	Calendar	Approve	Reject
03	Submit the school form? Family agent · Details filled. Review ready.	Family	Approve	Reject

Human in the loop / Illustrative workflow; no external actions in this demo

Your PA. In the room with you.

Bring Omni to the meetings you attend.
Stay in the conversation. Leave with a plan.

Capture notes

Track action items

Draft follow-ups

Planned capability. Joining and note capture depend on platform support and participant consent.

Omni

Your personal assistant

CONCEPT

AFTER YOUR MEETING

Already organized.

Decisions

A clear summary of what was agreed.

Next steps

Tasks, owners and due dates.

Follow-up

A draft ready for your review.

You approve before anything is sent.

Approve / Reject

Earn a place in every day.

A consumer subscription. A repeat-use product.

01 / START NARROW

One recurring job.

Bill review gives people a clear reason to try Omni.

02 / BECOME A HABIT

One daily brief.

Bring money, plans and pending decisions into one place.

03 / EXPAND NATURALLY

A whole household.

Add shared routines and more agents as trust grows.

What should compound

Permissioned preferences / Connected workflows / Decision history

Proposed: personal and household subscriptions. Next proof: repeated use and willingness to pay.

The proposed stack.

9 services. Each with a specific job.

One person. Then millions.

Start with bills. Expand to schedules, renewals
and everyday admin. One simple decision.

Agents act. You stay in charge.

Product vision, not current scale. Prototype today; integrations, demand and pricing remain to be validated.
